*Beauty, Service and Economy of Maintenance
Are Designed Into The*

New **YMCA** **BUILDING IN DES MOINES**

Through the Intelligent use of
STRUCTURAL CLAY PRODUCTS

A most ingenious long range view toward lasting function combined with beauty was adopted by Mr. William Wagner, designer, of the firm Wetherell and Harrison, architects of Des Moines.

Goodwin Companies products were selected for extensive interior and exterior application throughout the building. Brick, tile, natural woods, ceramics, glass, and many other materials were blended into natural and permanent functional beauty.

Frosty Wirecut Brick, Glazed Provincials, and many types of structural tile are just a few of the Goodwin Companies products used.

The Y.M.C.A. building is well designed to fulfill its function of wide use of individuals and groups of all ages and of varied interests.

HERE'S SOMETHING YOU'LL WANT

For a fact sheet on the central YMCA building complete with material costs and comparison figures, just drop us a line. You'll find the material to be of great value.

ARCHITECTURAL ALUMINUM REDUCES COST, SAVES MAINTENANCE ON EVINRUDE MOTORS BUILDING

Light weight, yet rugged — these trim clean lined panels enabled Evinrude Motors to cut framing cost and hasten erection through speed of handling. As a user of over a million pounds of aluminum in the manufacture of their outboard motors Evinrude was very much aware of aluminum's ability to stay clean and beautiful through years of weathering.

West Bend, Wisconsin
Architect: Charles Woehrl and Associates,
Madison

Chapter Notes

THE CATHOLIC PROPERTY ADMINISTRATION's 1960 national architectural awards program was held in Milwaukee and conducted with the cooperation of the Wisconsin Chapter, AIA. Alvin E. Grellinger, AIA, acted as Professional Adviser.

One Chapter member, Charles Woehrl and Associates of Madison received Honorable Mention in the Convent Category for the St. Frances Cabrini Convent, West Bend, Wisconsin. First prize in the Convent category went to Charles D. Hannan, AIA, of Framington, Michigan for his St. William Convent, Walled Lake, Michigan. Honorable Mention was also given to Robert L. Svoboda, AIA, Detroit, for St. Hilary Convent, Redford Township, Detroit, Michigan.

Other final selections were:

Category—Churches seating more than 400: First—Queen of Snows Church, Squaw Valley, California. Architect J. Clarence Selciano, AIA, Santa Rosa, California. Honorable Mention—Blessed Sacrament

Church, Warren, Ohio. Architect—P. Arthur D' Orazio, AIA, Youngstown, Ohio.

Category—Elementary School: First—Sacred Heart School, Boulder, Colorado, Architect—Langehart & McGuire, AIA, Denver, Colo. Honorable Mention—St. Anthony's School, Everett, Mass. Architect—Lawrence J. Cuneo, AIA, Malden, Mass.

Category—High School: First—Maria Regina High School, Hartsdale, N. Y. Architect—McCoy & Blair, AIA, White Plains, N. Y. Honorable Mention—Madonna High School, Niagara Falls, N. Y. Architect—Thomas Justin Imbs, AIA, Buffalo, N. Y. Honorable Mention—Mount St. Joseph Academy, Philadelphia. Architect—Noland & Swinburne, AIA, Philadelphia.

Category—Hospital: First—St. Mary Hospital, Manhattan, Kansas. Architect—F. O. Wolfenbarger, AIA, & Associates, Manhattan, Kansas. Honorable Mention—Frank Cuneo Memorial Hospital, Chicago, Ill. Architect—Beli & Beli, AIA, Chicago. Honor-

John E. Somerville Associates, Inc.

Green Bay, Wisconsin

Brown County Veterans Memorial Arena

Brown County Veterans Memorial Arena
Architect: John E. Somerville Associates, Inc.
Green Bay, Wisconsin

The Brown County Veterans Memorial Arena, Green Bay, has: *Activities Area* one hundred seven feet wide and two hundred seventy feet long with removable hardwood floor and other portable equipment for hockey, boxing, basketball, stage shows, etc. *Seating* for 5,844 in the main arena; 3,844 permanent and 2,000 portable. *Skating Facilities:* An ice rink two hundred by eighty-five feet maintained by an automatic refrigeration system and a Zamboni ice resurfacers,

removable hockey dashers, atmospheric lighting for public skating. The Skating Lobby is fitted with lounge seating and tables and there is a skate change and rental room as well as a skate repair shop. *Memorial Hall*, an air-conditioned banquet room in an adjoining building has its own entrance and lobby. Its floor space is forty by seventy-two feet unobstructed, and it will seat two hundred seventeen for banquets or three hundred twenty in auditorium arrangement. Caterer's

and scullery kitchens are attached. Three meeting rooms can be used separately from the main activities area or in conjunction with it for large events.

The ice rink contains ten miles of one and one-quarter inch wrought iron piping through which a total of twelve hundred gallons per minute of brine is circulated continuously. The brine temperature is held at a constant sixteen degrees Fahrenheit with two automatically controlled refrigeration machines. Each twelve cylinder refrigeration machine is powered by a one hundred twenty-five horsepower motor and is capable of producing one hundred tons of ice per day.

When necessary to prepare for other events, the ice can be removed from the floor in three hours. The ice floor can be replaced in eight hours, giving the Area complete flexibility in scheduling programs and events.

The Arena is steam heated throughout, with steam supplied by two gas-fired steam boilers. Air circulation is maintained by four large blowers and six auxiliary air handling units with a total capacity of three hundred thousand cubic feet of air per minute. All air is filtered and fresh air is admitted for ventilation purposes.

Photos by Interstate Photographers

WHEN AMERICA BUILDS FOR ECONOMY . . . IT BUILDS WITH CONCRETE

Sears, Roebuck & Company's Tampa store . . .

concrete folded plate roof achieves large, unobstructed floor area

One of the basic requirements here was to achieve unobstructed floor space with economy. Architects Weed, Russell, Johnson & Associates found the answer by using a concrete shell in the form of a folded plate. This construction made it possible to span the entire floor area with only one interior row of columns . . . and suspend the second floor from the roof. The result: 163,715 square feet of *fully flexible* floor space, so important to any retail selling operation.

Folded plate design is, in itself, unique and interesting. And only concrete can give the added boldness of the wide, cantilevered overhang.

It's one more example of the way new uses of concrete are bringing big economies and added vitality to both conventional and modern architecture.

PORTLAND CEMENT ASSOCIATION

735 North Water Street, Milwaukee 2, Wisconsin

A national organization to improve and extend the uses of concrete

FOR STRUCTURES...

Isometric view showing 125-foot c on c spacing of main columns. Floor slab is supported by 3-inch plates welded together to form a hanger. Hangers are spaced 25 feet c on c.

It's easy to see the advantages of **FORRER'S** functional-fashion planning

New trends in office furnishing are always welcomed at Forrer's and utilized in the situations where they will be most effective. Using the new Herman Miller comprehensive storage-system in this Milwaukee Department Store Executive office, Forrer's specialists planned and furnished an office area which is truly flexible. Since all the elements in this system . . . shelves, files, storage units and panels . . . can be arranged in hundreds of variations, the Herman Miller comprehensive storage system can fit a wide variety of requirements. Let FORRER specialists show you the advantages of

FORRER FUNCTIONAL-FASHION PLANNING . . . suited to *your* business needs . . . to save you time and money . . . and to make your work hours more pleasant.

Get the facts now on the CONCRETE RESEARCH

Pre-stressed MONO-WING

Concrete Research has designed an improved successor to the familiar "double-tee" section . . . the Mono-wing! The "wing" of each member fits into the rabbeted recess of the preceding member . . . providing strong, overlapping and invisible joints . . . appearance that measures up to the highest esthetic standards.

MONO-WINGS

CHANNELS

SPANCRETE

prestressed precast concrete floor and roof systems

An ever-increasing number of architects are specifying Spancrete, because it assures greatest load-carrying capacity, while keeping building costs at a minimum. Additional bonus: Spancrete concrete floor and roof systems reduce construction time . . . save on materials, labor and supervision . . . rate highest in versatility and flexibility.

For the complete quality-economy story . . . and before planning your next building project . . . contact your Spancrete representative.

U. L. AND STATE APPROVED FOR 2 HOUR AND 4 HOUR FIRE RESISTIVE RATING

able Mention — St. Mary's Hospital, Detroit Lakes, Minn. Architect — Foss & Co., AIA, Moorehead, Minn.

WISCONSIN ARCHITECTS FOUNDATION new officers are: Roger Herbst, President; Frank Shattuck, Vice President; Wallace R. Lee, re-elected Secretary-Treasurer.

The Foundation has voted to offer a monetary award for the Wisconsin Painters and Sculptors 1960 Competition.

THE STUDENT ASSOCIATION OF LANDSCAPE ARCHITECTS conference at the University of Wisconsin, Madison, on April 9 and 10 was co-sponsored by the Wisconsin Chapter, AIA. The purpose of the conference was the promotion of co-operation and co-ordination among design professions.

THE NEW NAME for the Hinkens and Losch architectural firm is George H. Hinkens, Architect, 5856 North Port Washington Road, Milwaukee.

SPEAKERS from the Wisconsin Chapter have been unusually busy in 1960. They are:

January 27 — Willis and Lillian Leenhouts at the Wisconsin Painters and Sculptors on "Living Elements of Art and Architecture".

February 16 — Nathaniel Sample at Monona Grove School and Wisconsin High School, Madison.

February 17 — Robert Torkelson at East High School, Madison.

February 23 — Kenneth Kurtz at Alpha Omicron Pi Alumnae meeting on "The Modern House".

February 29 — John Brust, Art Reddemann and Karel Yasko at the Mechanical Contractors Association of Wisconsin State Convention.

March 2 — John Jacoby at the Victory School PTA showed the film "School for Johnny".

March 9 — George Schuette at Dominican High School, Milwaukee.

March 11 — Thomas Eschweiler at Don Bosco High School, Milwaukee.

March 15 — Lillian Leenhouts at the Kappa Alpha Theta Alumnae meeting.

March 18 — Robert Klocks in at Washington High School, Milwaukee.

March 22 — Art Reddemann at Longfellow Junior High School, Wauwatosa.

March 22 — Nathaniel Sample at West High School, Madison.

April 4 — Myron Sielaff at Arrowhead High School, Hartland.

April 6 — Richard Scheife at JunEAU High School, Milwaukee.

April 8 — Charles Haeuser at the Masonry Contractors Association monthly meeting on the problems of architects and masonry contractors on supervision and specifications.

April 13 — Dan Reginato at Pulaski High School, Milwaukee.

RICHARD W. E. PERRIN has been reappointed to a three-year term on the A.I.A. Committee on Preservation of Historic Buildings.

TO THE POINT

LOS ANGELES SCHOOL BURNING TEST WIDELY MISINTERPRETED

The Recent School Burning in California to test building design and fire protection equipment under carefully controlled conditions has caused a great deal of comment . . . pro and con. Some interpretations of the test findings are highly questionable, and in complete conflict with the objectives and results of the tests. One such statement is that "fire doors didn't retard the spread of fire or smoke." Actually, the test was conducted with stairwells open for three stories.

Fire experts already knew before starting "Operation School Burning" that most fire doors aren't kept closed in ordinary use—and *this is the problem!* Open or wedged fire doors are about as useful as a sprinkler system with the valves closed. The official report, "Operation School Burning," did not say stairwell enclosures (i.e., fire doors, Fire Barriers) are undesirable. No fire door can do its job if it's open. Many states have enacted criminal laws with fines as high as \$300.00 for anyone found wedging a fire door open. There's still nothing more effective than a fire door for stopping smoke and the spread of fire and keeping evacuation routes open.

* * *

A Recent Complaint from one of our hollow metal door customers was quieted somewhat when we explained the function of our new Customer Service Department. While our firm delivery policy is *first in, first out*, we recognize there are occasions when we can meet a customer's urgent needs and still fulfill our other production commitments. Our Manager of Customer Service sees to it that Overly's scheduling is "sales-minded." The best policy any manufacturer can offer is fast, immediate service while maintaining honest service to our other customers. In the long run, this policy favors all our customers.

Welcome Aboard . . .

The Wisconsin Chapter, AIA, welcomes the following who recently have been accepted or advanced in membership:

EUGENE H. CARTER has advanced to Associate member. He was born July 18, 1926 in Minneapolis, and attended Marquette University College of Engineering and Layton School of Art. Carter has been a draftsman with the Milwaukee firm of Brust and Brust since 1954. He served two and one-half years with the United States Army.

PHILIP COTTON, JR., a new Junior Associate member, is employed

by Darby-Bogner and Associates in West Allis. Cotton was graduated from Princeton University in 1954 with a Bachelor of Arts Degree, and received his Bachelor of Architecture from

Harvard University in 1960. He has traveled in Europe and lists his hobbies and interests as reading, writing, music, sculpture, tennis, riding and soccer.

LEROY H. FRITSCHLER rejoins the Chapter as an Associate member.

He was born October 6, 1924 at Tomahawk, Wisconsin. Fritschler has been a draftsman with the Donn Hougen firm of Wisconsin Rapids since 1948. He served three years in the United States Marine Corps.

JOSEPH L. GODKIN, a new Junior Associate member, was born May 30, 1930 in New York City. He received his Bachelor of Architecture Degree

from the Catholic University of America, Washington, D. C., in 1955. He has been a designer with the Milwaukee firm of Brust and Brust since August, 1958.

JAMES G. NEU, a new Junior Associate member, was born in Milwaukee on January 27, 1931. He attended the University of Illinois School of Architecture for four years. Neu has been draftsman and field superintendent with the South Milwaukee firm of Zarse Associates since June 1959. He has traveled in Mexico and Japan and lists his hobby as photography.

ROGER H. NIEMANN, a new Associate member, was born March 22, 1937 in Wisconsin Rapids and attended the University of Wisconsin for two years. He is employed as a draftsman by the Donn Hougen firm of Wisconsin Rapids.

His hobbies are hunting, fishing, and painting.

WILLIAM E. SCHOMMER has advanced to Associate member. He was born June 28, 1931 in Menasha, and received a Bachelor of Architectural Engineering from Chicago Technical College in 1954. He has been a draftsman with the Milwaukee firm of Brust and Brust since April, 1956. Schommer served in the United States Air Force and lists his hobbies as photography, golf, and skiing.

ARMSTRONG BUILDING SUPPLIES

3117 W. Mill Road • Milwaukee 9, Wis. • Flagstone 2-1910

AIA CONVENTION
SAN FRANCISCO
1960

This year's annual convention of the American Institute of Architects will be held April 18 to 22 at San Francisco.

Some two thousand architects from all parts of the country are expected to hear J. Robert Oppenheimer, director of the Princeton Institute of Advanced Studies, and Cyril Northcote Parkinson, historian and author of "Parkinson's Law" among other well-known authorities in science and the humanities.

Under the general theme "Expanding Horizons" the architects will explore the trend of political, economic, technological and philosophical developments so as to help the architectural profession to keep ahead of changes in the human environment.

Oppenheimer's and Parkinson's speeches and those of philosopher Morton Gabriel White of Harvard and sociologist Wendell Bell of the University of California will be related to architecture by panels of outstanding architects.

The panels discussions and business meetings of the convention will be held at San Francisco's new Masonic Temple. Convention headquarters will be at the Mark Hopkins Hotel.

The convention program also features the ceremonial Investiture of newly elected Fellows of the AIA and a President's Reception both at San Francisco's famous City Hall.

Other convention events include a tour through San Francisco and the Bay area's outstanding houses, and an "open house" party on San Francisco's historic Jackson Square. Convention goers are invited to participate in the host city's annual Black and White Symphony Ball.

The San Francisco Museum of Art will show an extensive exhibition of the work of LeCorbusier, world famous architect, planner, painter and sculptor. Born in Switzerland, LeCorbusier, whose real name is Charles Edouard Jeanneret, has created important buildings all over the world. Among his most famous works is the planning of the city of Chandigarh, the new capital of Punjab in India.

The LeCorbusier exhibit was designed and arranged in Switzerland. From San Francisco it will travel to Tokyo where it will be shown in LeCorbusier's newly completed Museum of Western Art.

In the course of its Annual Dinner the AIA will again present a Gold Medal to an outstanding architect as well as the Institute's other awards. The R. S. Reynolds Memorial Award, the Homes for Better Living Awards and other honors will be presented at morning sessions.

Another convention feature is the exhibition of new building products at the Masonic Temple. There are 91 different product exhibits.

DoxPlank FLOOR and ROOF SYSTEMS

The DOX PLANK system was selected for use in this modern office building because it combines the high compressive strength of concrete and the high tensile strength of steel. DOX PLANK features make it the favorite of architects, engineers and contractors for use in schools, commercial buildings, factories, apartment houses and private homes. It offers the special advantages listed below.

- Economical
- Is Fire Resistant
- Saves Time and Labor
- Immediate Working Deck
- Speeds Building Occupancy
- Reduces Cold Weather Delays
- Conforms With Standard Building Practices
- Eliminates Hazards of Improper Field Construction

VanderHeyden Inc.

Serving the Building Industry Since 1912

Build home-buyer appeal with

**2-bathroom
convenience
+
KOHLER
quality fixtures**

High on the most-wanted list of home owners is *more bathroom convenience*. Their reasons are many: to meet the needs of growing families; relieve traffic delays during peak wash-up periods; insure more privacy; provide gracious accommodations for guests.

Most home buyers are willing to pay a little extra for better bathroom or washroom facilities because they know this will add recognizable value to their home, and make it easier to sell or trade should they decide to move.

For a master bathroom, the Kohler Dynametric bath of balanced design with symmetrically enlarged bathing area, and the Tahoe built-in lavatory, offer distinguished appearance, luxurious comfort. For a space-saving second bathroom, beauty and convenience are assured by the trim, compact Minocqua bath and the graceful circular Radiant lavatory. All fixtures are of rigid, durable enameled iron—and have Kohler all-brass Constellation fittings.

KOHLER CO. Established 1873 KOHLER, WIS.

5' Dynametric bath, Tahoe lavatory (Sizes 20 x 18", 24 x 18")

4 1/2' Minocqua bath, Radiant lavatory.

Milcor Metal Base now Standardized

*...and available
from inventory!*

**NO. 625 SPLAYED
METAL BASE
FLARES OUT**
to prevent furniture
and movable equip-
ment from bumping
walls in hotels, hospi-
tals, and institutions.
One of the many styles
in the standardized
Milcor line.

Now...quick delivery, lower costs, same high quality
simplify your project problems

Now you can specify Milcor Metal Base as a standard item available through building supply dealers. You can provide the advantages of steel at an installed cost competitive with costs of bases made of other materials. All styles of Milcor Metal Base — and all other items in the nation's most complete metal lath line — are described in the Milcor catalog in Sweet's Architectural File, section 12a/In. If you would like a personal copy, write for catalog 202.
